Who we are

PRO EXPO is an international leading trade show design and building agency with more than 35 years of experience, making us the perfect solution for companies looking to get their Brand notified and achieve notable results. We deliver high impact custom-made stands incorporating eye-catching and innovative designs.

Based in Barcelona and extremely well traveled, our team of project managers work internationally to take our designs to the world's most important trade fairs, as each year we design & build more than 200 stands in Spain around Europe and across numerous sectors. We are experts in pharmaceutical, medical, retail IT and engineering fields.

Why do our customers choose us?

- Over 35 years experience
- Sustainable solutions
- International team
- Full approach/supervision
- We deliver beyond your expectations

Our storage

- 2,000m² storage facilities at the outskirts of Barcelona
- Maintenance and refurbishment of reusable elements
- Integrated online inventory

Sustainable solutions

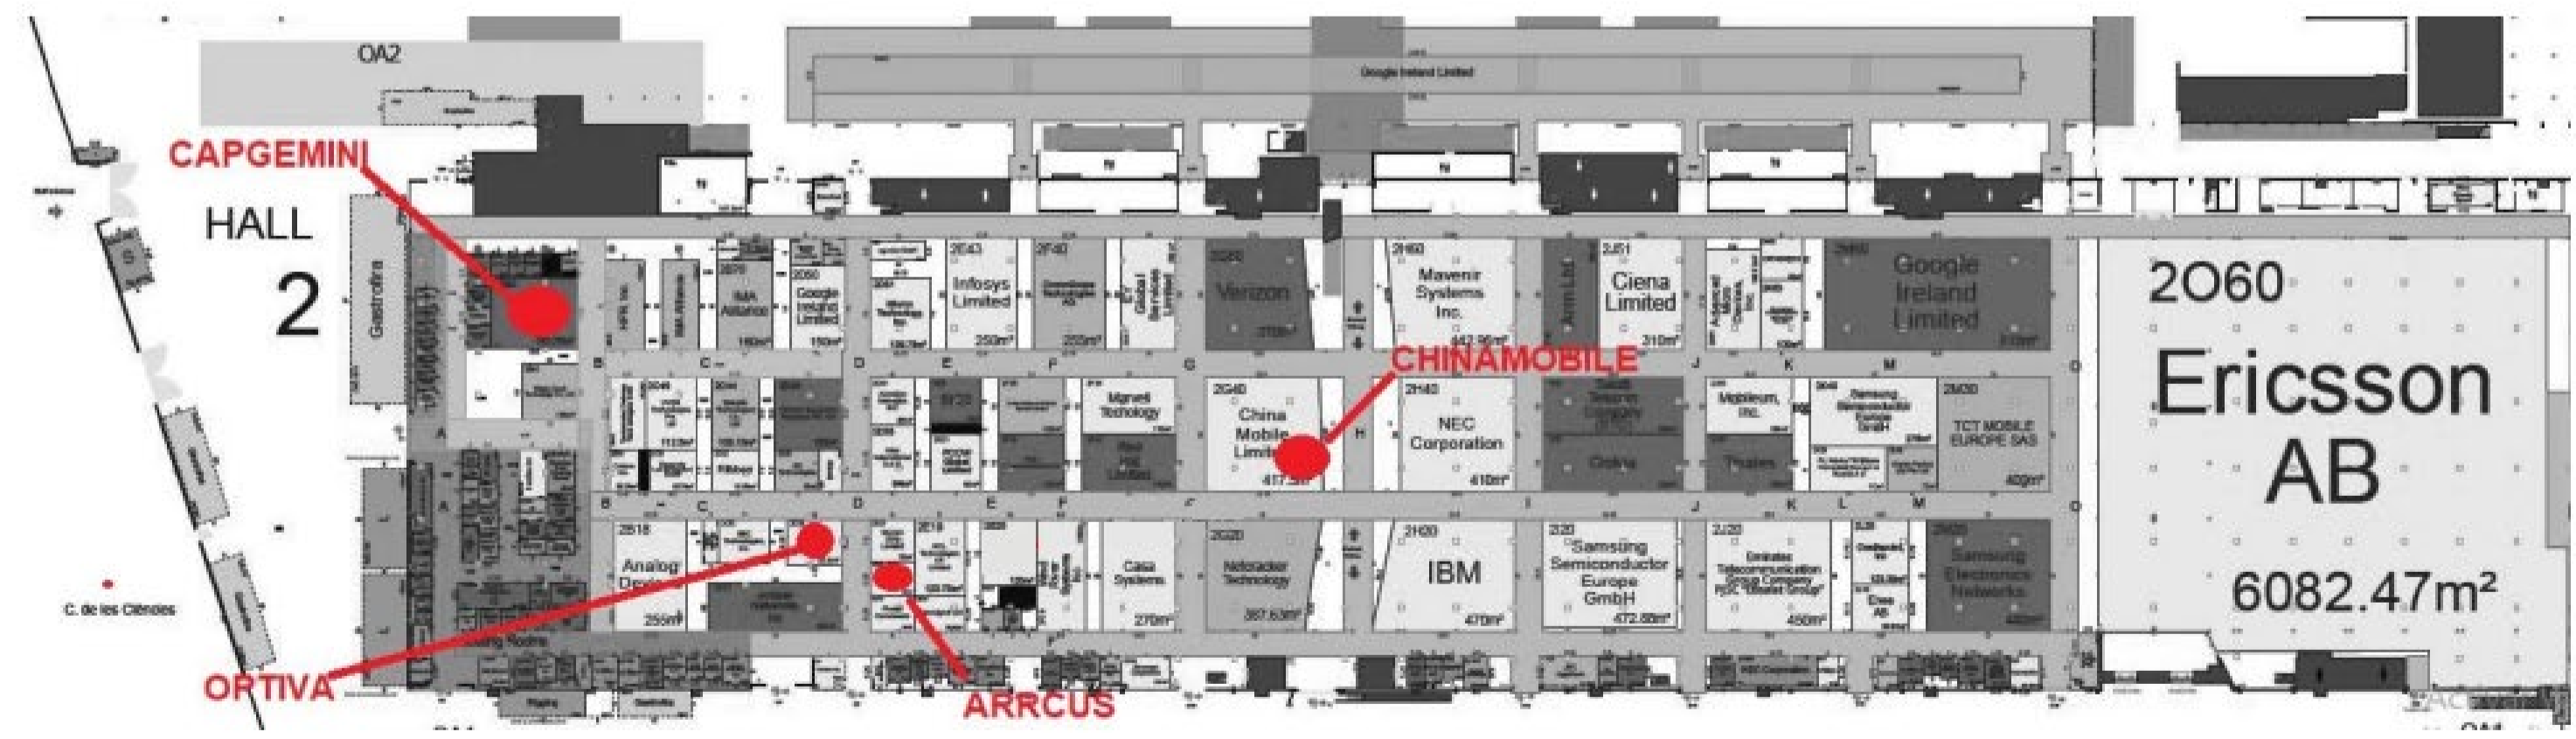

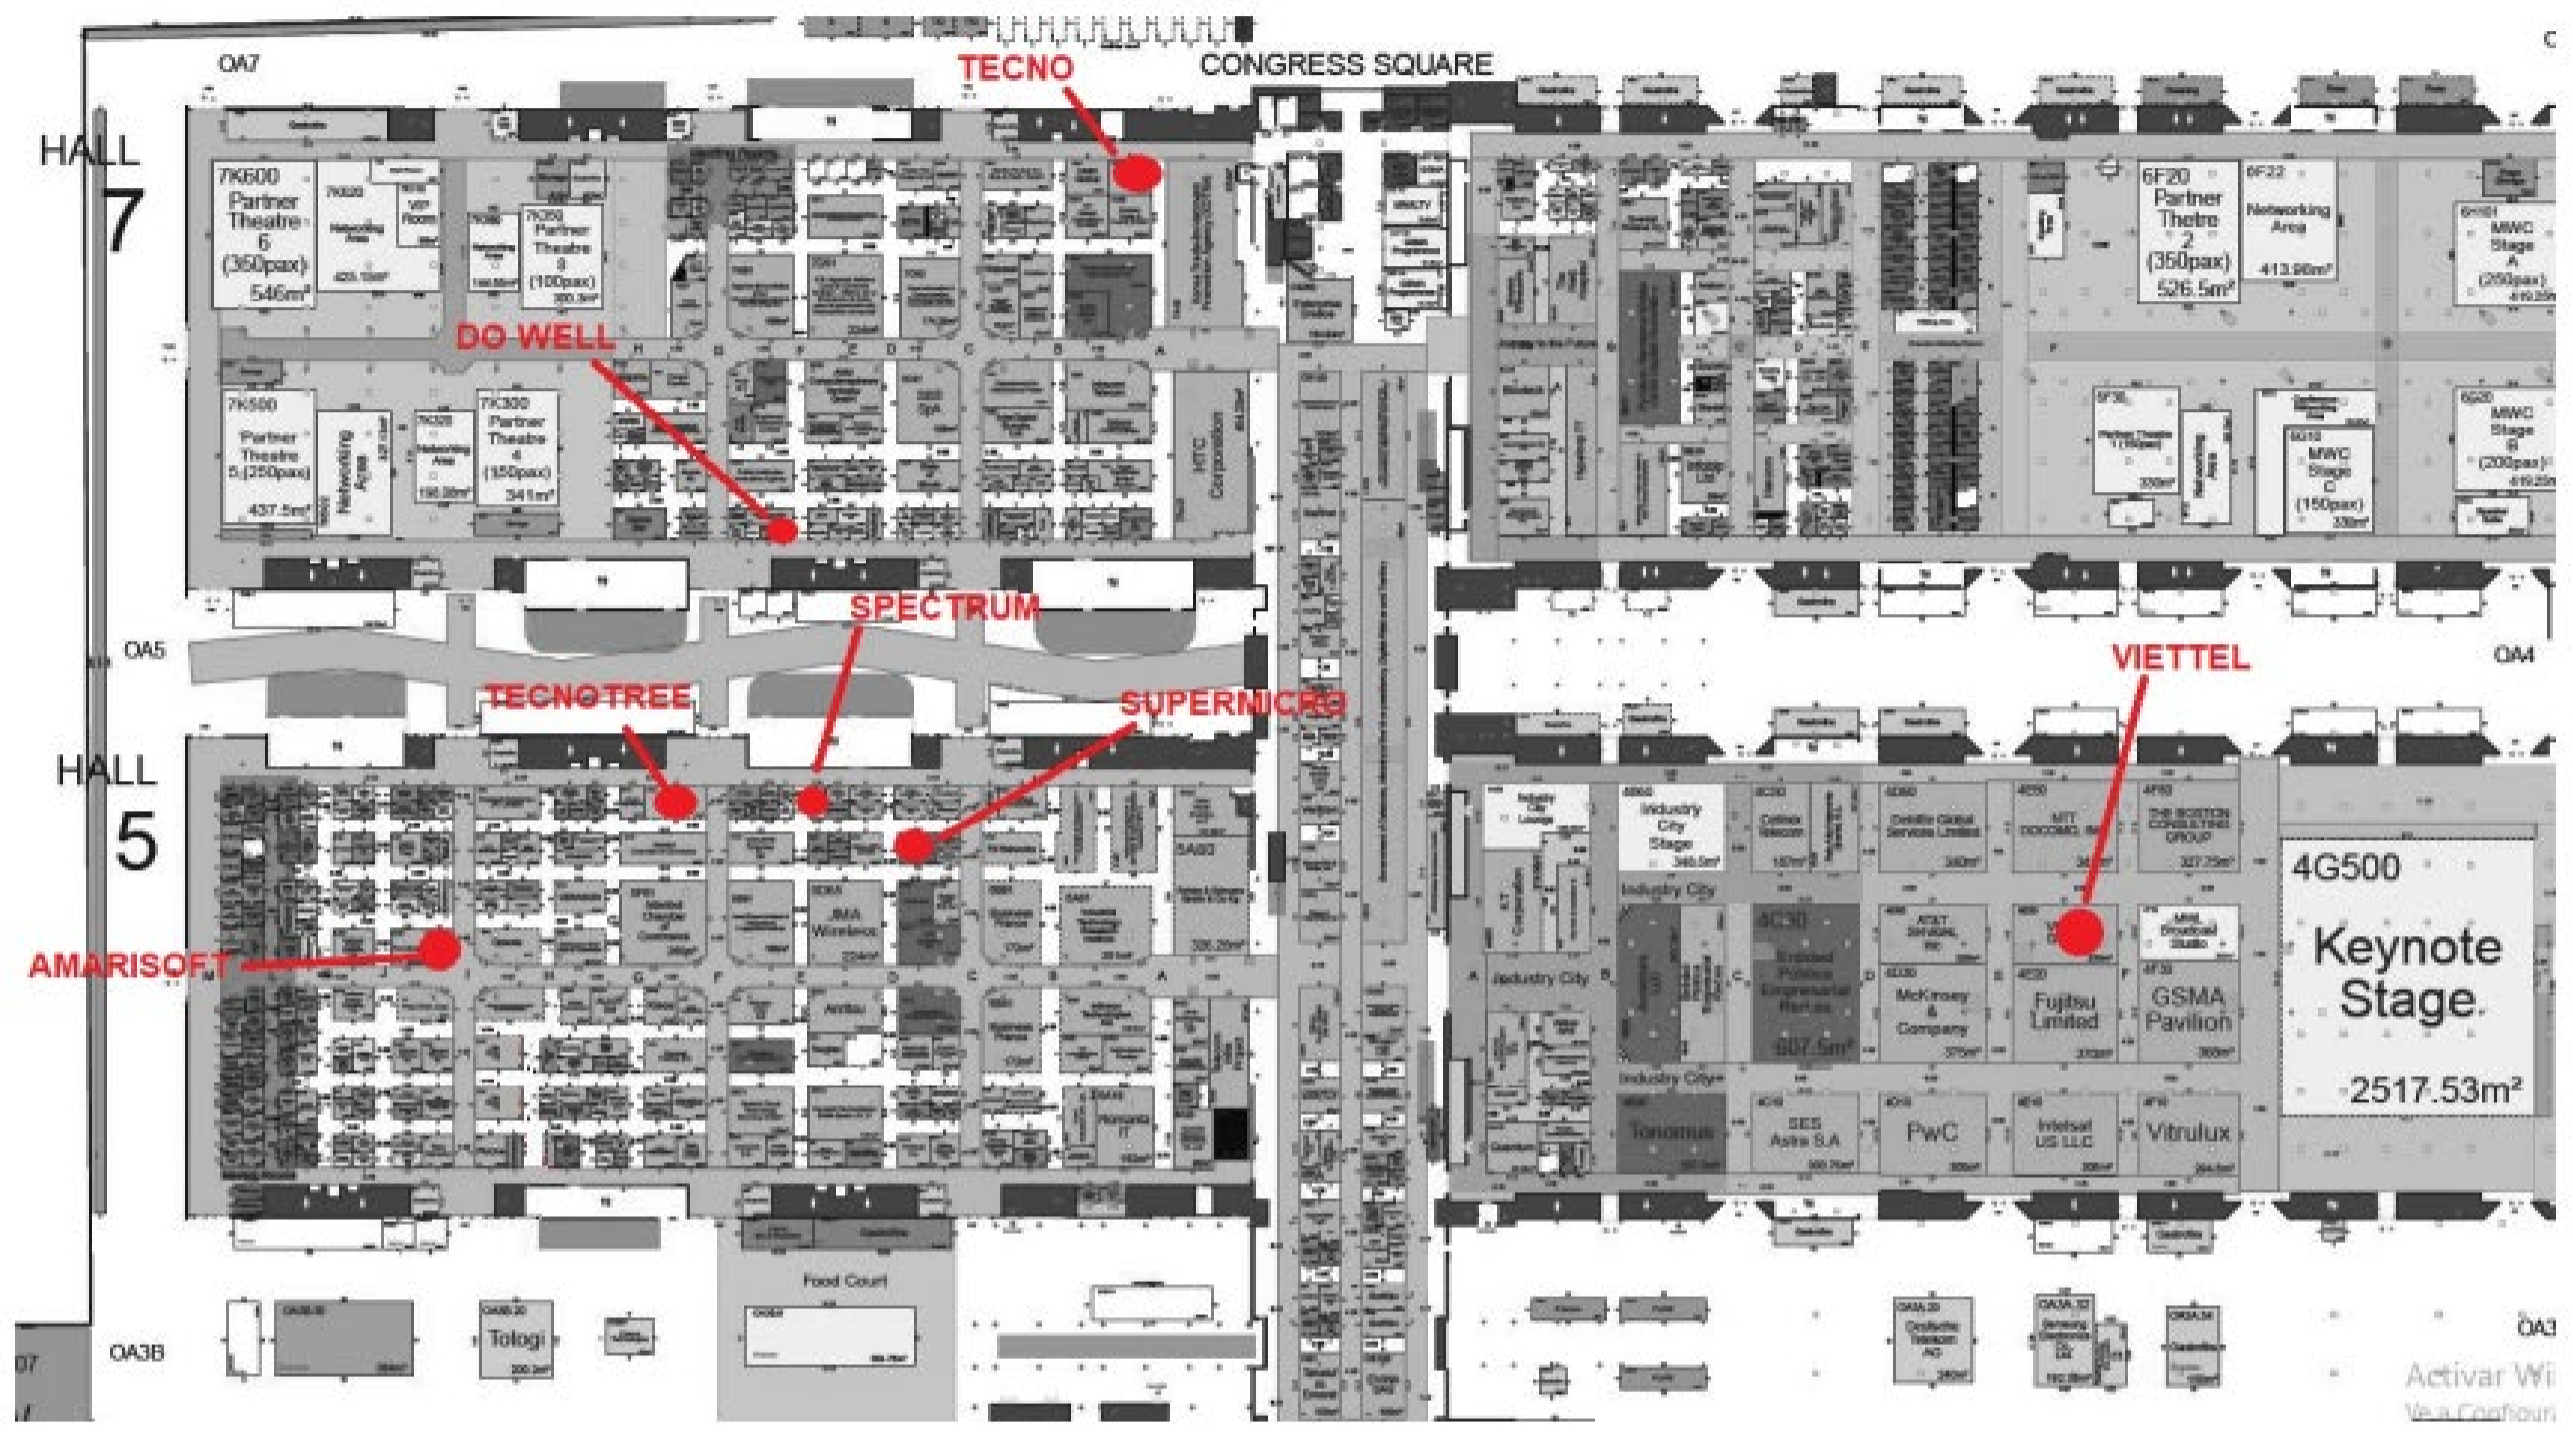

We are using sustainable building systems such as Aluvision –we are their official partner in Spain– and German Octanorm that utilize stretched fabrics tensed into aluminum frames.

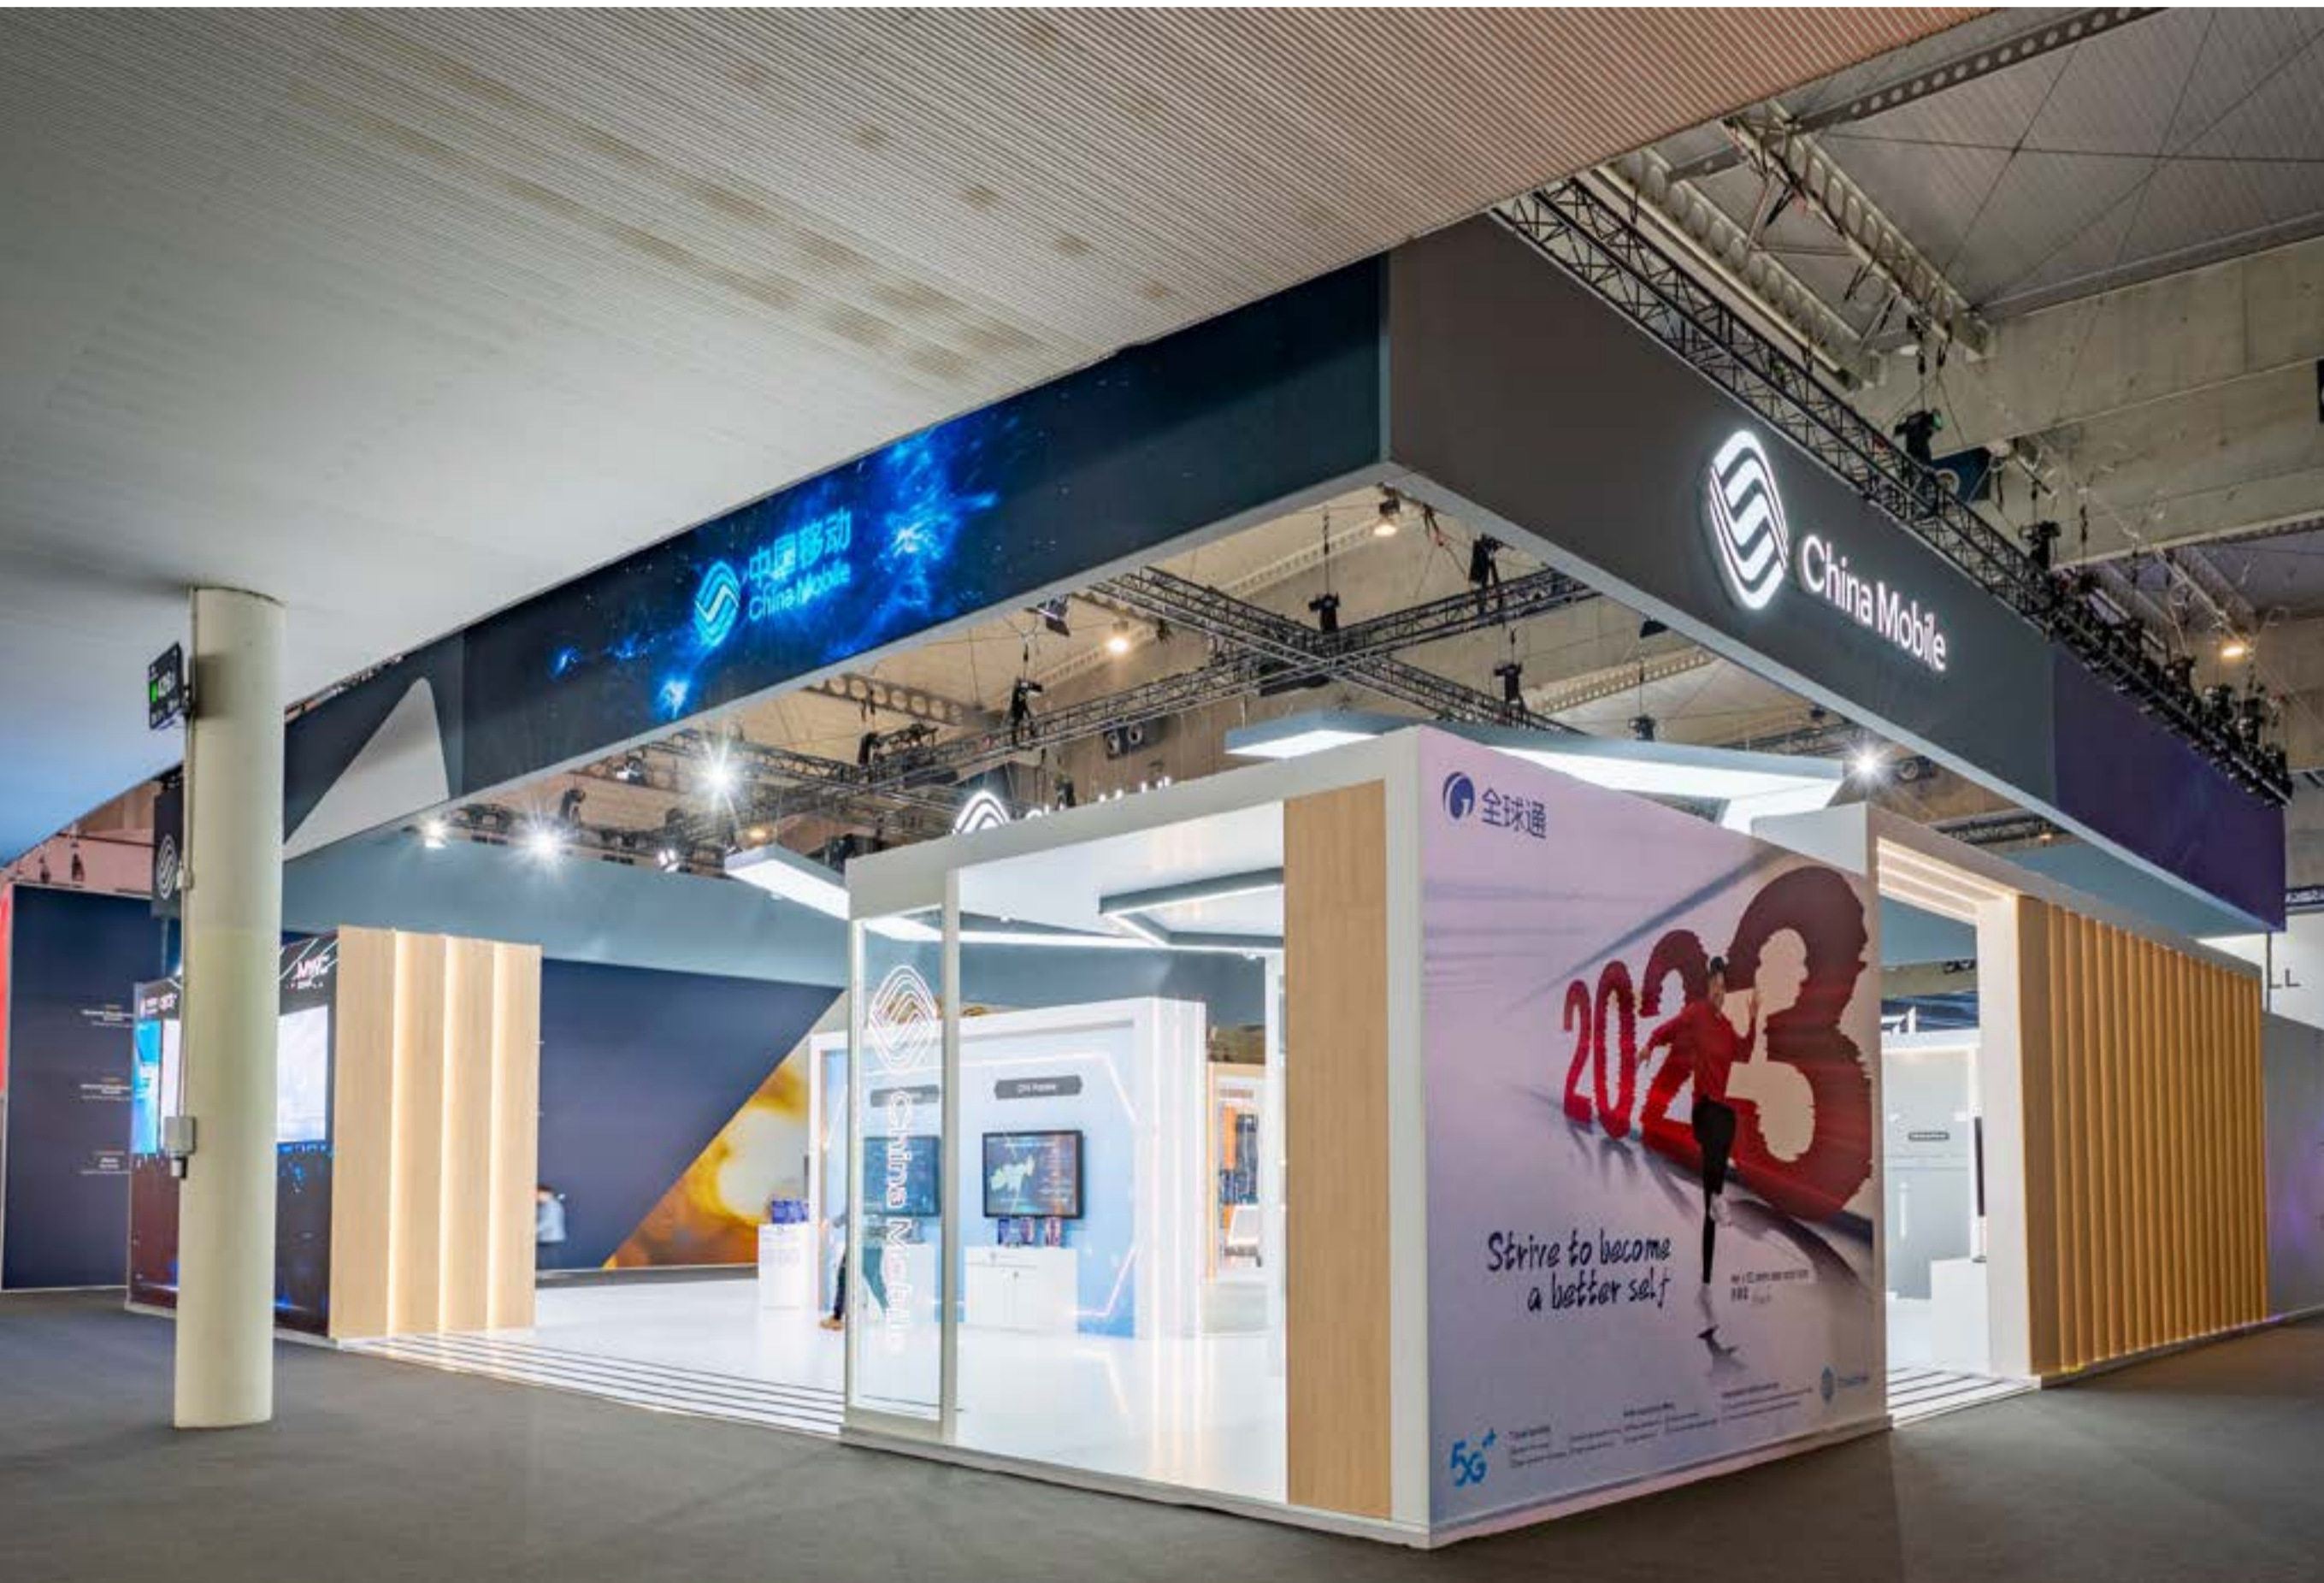

A 3D architectural rendering of a large, modern exhibition booth for Capgemini. The booth is a two-story structure with a glass facade and a white interior. The Capgemini logo is prominently displayed on the upper level. The ground floor features several interactive stations with large digital screens and white display units. There are also seating areas with blue chairs and tables. The overall design is clean and professional, typical of a high-profile trade show booth.
